![trax]

Trax Technologies

Optimize your supply chain for growth, compliance, and resilience with normalized global supply chain data and technology-enabled freight audit.

The Challenge

Traditional freight audit doesn't work.

In traditional freight audit, data is...

⚠ Unavailable   ⚠ Limited   ⚠ Low quality

⚠ Unstandardized   ⚠ Constraining

Businesses face challenges like limited control, outdated processes, and resource constraints, all compounded by a volatile global market. Narrow scopes, poor integration, and conflicts of interest further hinder efficiency and the ability to achieve meaningful returns.

The Solution

Supply Chain Spend and Compliance Management

Optimize your supply chain for growth, compliance, and resilience with normalized global supply chain data and technology-enabled freight audit.

Global Freight Audit   **Freight Data Management**   **Managed Services**   **Carbon Compliance**

The Result

5-7%

On average, Trax customers save 5-7% of their annual transportation spend.

Trax systems unlock data that is...

✔ On-demand   ✔ Expansive   ✔ Complete

✔ Normalized   ✔ Freeing

Trax's freight audit solutions provide real-time visibility, streamline processes, and optimize resource use, enhancing operational efficiency and scalability. Businesses can adapt to global challenges while building trust and reducing risk.
